

Character Bio:

During the experimental detonation of a gamma bomb, scientist Bruce Banner rushes to save teenager Rick Jones who has driven onto the testing field; Banner pushes Jones into a trench to save him, but is himself hit with the blast, absorbing massive amounts of gamma radiation. He awakens later in an infirmary, seeming relatively unscathed, but that night transforms into a lumbering grey form that breaks through the wall and escapes. A soldier in the ensuing search party dubs the otherwise unidentified creature a "hulk". The original incarnation of Banner transformed into the Hulk at sunset and reverted at sunrise. Banner was cured but chose to restore Hulk's powers with Banner's intelligence. The gamma-ray machine needed to affect the transformation-induced side effects that made Banner temporarily sick and weak when returned to his normal state.

The Hulk became a founding member of the title's eponymous superhero team The Avengers. The overuse of the gamma ray machine rendered the Hulk as an uncontrollable, rampaging monster, subject to spontaneous changing. It was during this time that the Hulk developed a more savage and childlike personality, shifting from the brutish figure who spoke in complete sentences and his memory, both long-term and short-term, was markedly impaired in his Hulk state. Banner's and the Hulk's dual identity became publicly known when Glenn Talbot, Banner's romantic rival for [Betty Ross](#), witnessed his transformation, turning Banner into a wanted fugitive.
